Drawings-File 1 of 3-13 January 2010.pdf.zip

---

Hi Tom and Lene,

Please find the attached construction drawings for the expansion construction at Waimanalo Gulch Sanitary Landfill for your use and review. Due to the large file size(s), you will be getting a series of emails from me that will contain the complete set of construction drawings as discussed, along with a narrative explaining the sequence of construction events for this project. Full size hard copies will be delivered to your office tomorrow as soon as we receive them in transit from California. If at any time you have any questions regarding these drawings, please let me know. I am more than willing to sit down with HDOH to discuss the drawings and answer any questions or concerns with the drawings at a time of your convenience. Please stand by for four (4) more emails to complete the set.

Thank you,

Jesse Frey
